

SETTING THE NEW STANDARD IN RAILCAR MOVING TECHNOLOGY

www.bossrcm.com

MODEL OVERVIEW

SAFETY IS OUR #1 PRIORITY!

The BOSS is equipped with features that maximize safety for both the operator and the working environment.

LIGHTING

The BOSS has a total of 17 LED lights which include the following:

- 6 flood lights mounted to the front of the machine
- 2 flood lights mounted to the rear of the machine
- Flood lights mounted at steps on each side of the machine
- Stop/taillights/hazards mounted at each corner of the machine

MIRRORS

The mirrors on the BOSS extend beyond the railcars providing the operator with the best visibility. Mirror positions can be remotely adjusted and also incorporate powered and heated lenses.

CAMERA SYSTEM

Visibility is synonymous with safety in the BOSS vocabulary. That's why we offer more cameras and camera options than any other railcar mover manufacturer. BOSS provides the clearest views in the harshest conditions. The system includes cameras mounted on the left mirror, right mirror, rear hood, front and rear rail gear with options for additional configurations. Mirror cameras can be adjusted to suit all applications. Mirror camera feed is broadcasted on the left and right displays during road and rail operation. Rail gear feed automatically broadcasts to the left and right displays while mounting to the rail. Rear view is available on the console display at all times. All cameras are infrared for nighttime operation and include built-in heaters to maximize reliability in all weather conditions, and image stabilization.

AUDIBLE ALARMS

The BOSS is equipped with an air-operated horn to alert the surrounding area when moving railcars. In addition, a 102 DB backup alarm automatically sounds when the machine reverses in road mode and automatically adjusts to match ambient noise levels.

NEXT LEVEL OPERATOR COMFORT

360° VISIBILITY

Enhanced sightlines for improved awareness.

INTEGRATED HVAC SYSTEM

Ducting throughout the cabin ensures optimal climate control.

PRESSURIZED-SOUNDPROOF CAB

Creates a quieter and more comfortable environment.
